# Randeep (Randy) R. Singh

503 Firestone Drive, Ashton, MD 20861 | (301) 503-2918 | singhr_52@yahoo.com
Former Federal Employee | Meritorious Civilian Service Award – DISA
Portfolio: https://kalsr.github.io/KNet_Programming_Hub/

## Executive Summary

Senior Cybersecurity and Technology leader with extensive federal mission experience in artificial intelligence, machine learning, cybersecurity operations, and enterprise IT modernization. **Worked with Defense Information Systems Agency for 30+ years**. Proven ability to design and implement technology solutions that strengthen Cyber Defense, improve Threat Detection, and Enhance Operational Resilience. Recipient of the **Meritorious Civilian Service Award from the Defense Information Systems Agency (DISA).** Experienced leading multidisciplinary teams, developing strategic technology roadmaps, and integrating emerging technologies including AI-driven analytics, automation, and cybersecurity simulation environments. **Took Deferred Resignation Program (DRP) from DISA on March 2025 & Retired from Emerging Technologies Division on December 2025.**

## Core Competencies

Cybersecurity Strategy • AI & Machine Learning • SOC Operations • Threat Intelligence • Incident Response • Risk Management Framework (RMF) • Enterprise IT Modernization • Security Automation • Red/Blue Team Simulation • Network Security Monitoring • Data Analytics & Visualization • Strategic Technology Planning • Program Leadership • Emerging Technology Integration • Cross-Agency Collaboration. & Expert in API-Security

## Professional Experience

Computer Scientist, GS-1550-14 | Defense Information Systems Agency (DISA), Fort Meade, MD | 1989–2025

• Led development of AI/ML, cybersecurity analytics, and automation frameworks using Python and Java supporting emerging technologies including Zero Trust, Cloud, Edge Computing, Blockchain, IoT Security, and Big Data.
• Project Manager for API Security/Registry initiatives within DISA technology innovation programs.
• Developed AI/NLP/Sentiment Analysis applications and demonstrated operational use cases for DISA communications teams.
• Conducted research and experimentation on emerging technologies including IoT, 5G security, blockchain, and critical infrastructure protection.

• Collaborated with University of Central Florida on IoT feasibility study evaluating secure connectivity, system resiliency, and operational capabilities for DoD environments.
• Partnered with MITRE on Mission Mapping Prototype enabling identification of threats to critical mission functions.
• Conducted Industrial Control Systems (ICS) security analysis identifying forensic tools for SCADA malware detection.
• Supported CTO initiatives including enterprise virtualization, service management strategy, and capacity planning.

## Technical Skills

Languages: Python, Java, C++, COBOL
Technologies: AI/ML, Cybersecurity Analytics, SOC Platforms, Security Automation, Data Visualization
Frameworks: Risk Management Framework (RMF), Threat Intelligence, Incident Response, Enterprise Security Architecture

## Innovation & Technology Development

KNet Programming Hub – Independent platform demonstrating AI-driven cybersecurity analytics, cyber range simulations, threat detection systems, fraud prevention models, and analytics dashboards. **Last Job with Emerging Technologies Division (DISA/EIIC/EM2).**

## Education

MA, Mathematics – Guru Nanak University
BS, Computer Science – University of Maryland

## Teaching Experience

Adjunct Professor – Anne Arundel Community College, Prince George's Community College, Howard Community College, and Strayer University. Taught programming, operating systems, networking, database design (Oracle/PLSQL), internet programming, and systems analysis.

## Awards & Additional Information

Meritorious Civilian Service Award – Defense Information Systems Agency (DISA)
Security Clearance: Secret | Highest Grade Held: GS-14/08 | OPM/DEU Consideration: Yes
